Reading

Experience

Verra Mobility

4 Years

Lead UX designer and frontend developer for Bootstrap and SASS implementation in our .Net Core environments. I create and maintain XD design systems shared across multiple applications with coeditors. I also manage the CSS and HTML frameworks being shared via our CDN with multiple websites and communicate changes with our dev teams. I also themed and manage over 10 WordPress sites.

SRG Technologies

5 Years

Lead UI designer for Bootstrap and Less implementation in to our .Net environment. I oversaw the theming of our core product "Blender" in the education and healthcare industries for an array of clients. I also did code reviews and worked with a team of developers in India.

Vensure

2 Years

I was responsible for Vensure's marketing site, email campaigns, and social media. I setup and managed the marketing site using Umbraco. I also worked with a team of developers providing UI support for Vensure's intranet involving online insurance applications.

Experticity

5 Years

I oversaw the theming of our LMS platform to support large brands such as The Northface, Marmot, REI, and many more. Our training platform needed to support theming over 200 different brands using the same code base.

Succeed Corporation

2 Years

I took projects from concept to development for the iBuilder platform which received best of show at the Internet World Conference 2003.

iTools

2 Years

I was lead designer for the hosting platform of iTools/Onvia.com. I worked directly with the applications development team and oversaw two new product launches involving major interface changes.

Education

Brigham Young University

BFA Illustration Program

Studied Illustration and Graphic Design with an emphasis in editorial illustration.
